

Neuro-agility Profile™ Licenced Practitioner

Online Accreditation Programme

Help individuals, teams and organisations become more agile

Are you supporting people and organisations going through **change and transformation**? Helping people become more agile means improving their thinking, ability to innovate, learn and perform better, whilst also enhancing their health and wellbeing.

Become an Accredited Practitioner and lead the way in neuro-agility impact

Increasing, **measuring, and tracking** the agile brainpower of every individual, leader and team helps reduce the cost of change, enabling people to **think faster and more innovatively, learn faster and perform better.**

The Neuro-agility Profile™ Advanced+ assessment is a multi-dimensional, neuroscientific brain profile assessment. It describes a person's unique neurological design, explaining how they learn and think. It assesses 6 drivers that impact brain performance, which enable people to enhance their performance and agility.

The accreditation certifies **coaches, HR, talent, L&D, and performance improvement professionals** to assess and debrief people and teams on their unique neurological design (potential) and the drivers that optimise their brain performance and brain health.

7 benefits of improving brainpower:

1. **Improves individual and team performance** - improving brain fitness helps people work faster and smarter, so they achieve their goals more productively
2. **Develops leadership and change management skills** - problem-solving, critical thinking, and creativity. Based on accurate understanding of their neurological design, leaders and managers have a clearer understanding of how uniquely they deal with change, solve complex problems, think, learn, serve, influence, and inspire
3. **Promotes a learning culture** - helping improve people's ability to learn faster, concentrate and remember, sustainable advantage for the future.
4. **Improves emotional intelligence** - providing a predictive analysis and accurate awareness and management of their neurological design
5. **Enhances wellness, health, and safety** - helping manage stress, fatigue, identifying and minimising risk for human error, reducing accidents and promoting workplace happiness
6. **Improves talent selection and recruitment** - helping you align people's neuro-design with the jobs they do more effectively
7. **Boosts engagement** with people having an accurate understanding of who they are, how they fit in and can best contribute.

Your online accreditation programme consists of the following:

Your accreditation programme consists of the following steps:

1. Complete your **own Neuro-agility brain profile**
2. Online video learning prework
3. Interactive zoom **webinar one** (90 minutes): [Welcome introduction and Understanding the Brain](#). Getting to know each other, an introduction to Neuro-agility, how to get the most out of the accreditation learning process and finally exploring the flexibility of 7 factors of a person's neurological design
4. Self-study, online video learning
5. Interactive zoom **webinar two** (90 minutes): [Knowing how to boost the 6 drivers](#) of brain performance
6. Self-study continuation of online video learning
7. Interactive Zoom **webinar three** (90 minutes): Interactive [practise session](#) de-briefing a variety of Neuro-agility profiles, opportunity to explore marketing and any outstanding questions.
8. Self-study and **confirmation of learning assignment**
9. Membership of FPG's **Neuro-agility Practitioner's community** for continuing professional development.

Self-study learning

Once you have signed up to do the accreditation, you will receive a link to access a series of videos and your Neuro-agility downloadable workbook. During **webinar one** the content of this self-study learning will be explained to you in more detail. Throughout the accreditation you will work your way through 14 self-study modules, including 33 videos (total of 23 hours, approx.).

"As a coach I am convinced that a deeper self-awareness and self-knowledge supported by the scientific facts of the Neuro-Agility test help to set the focus for development and success. Neuro-Agility provides unique information and data to clients about the way their brain works, the way they learn best. When in our business world organisations are turning agile there is a role for us to support the journey of the individual towards agility and brain fitness to master learning needs and challenges with the constant change of the modern world".

Judit Ábri von Bartheld MA, MCC

Once you are accredited your potential income sources include:

- Profit margin on selling of individual and team profiles in addition to the fees you charge for one-to-one coaching debriefs and team facilitation at your rates
- Ability to provide additional and new insight into team dynamics PLUS any of your existing management, leadership & team programmes
- Complements all and any existing profiling, adding depth of the initial consideration of the brain
- Application in any industry & business, education, and sport
- Potential to deliver Neuro-agility masterclasses.
